

# Scow-heavy truck Volvo FM 440 (6x4)

Carrying capacity:  
45 tons

Specifications	
Model	Volvo FM 440
Carrying capacity	45 000 kg
Total number of axles	7
Wheel formula of the Volvo FM 440 tractor	6 x 4

Cargo platform dimensions	
Length	13,7 m
Width	2,55 m
Loading height	1,5 m

The scow-heavy truck has a dependent air suspension with height adjustment. The first and second lifting axles: automatic hanging depending on the load.

Loading on the scow is carried out lateral, top, or with the opening of the board. The sides of the scow are equipped with reliable fasteners, which ensure reliable fixation of special equipment of any shape.

With its help, it is possible to transfer construction and road special equipment (bulldozers, rollers, tower cranes, drilling rigs, combines), various equipment, tanks of different sizes, pipes, containers, metal and reinforced concrete structures, building materials on pallets, etc.
