

The **Zoomlion QY30V** mobile crane with a lifting capacity of **32 tons**, has the longest telescopic boom among analogs - **40 meters** and a lattice extension of **8 meters**, which together is **48 meters**!

The **Zoomlion** mobile crane has a three-axle chassis with two drive axles. Differential locks and low gears give it a very high cross-country ability.

Small overall height (**3.46 m**) allows the **Zoomlion QY30V5** truck crane to drive under many low arches in the courtyards of St. Petersburg, workshops of factories and enterprises! The supporting contour of the truck crane measuring **5.36 x 6.10 m** will allow you to sit both on a small site and on a road with two lanes! Services of the **32t Zoomlion QY30V5** mobile crane are indispensable for any work from the road in the absence of sites at all!

A **40 meter** telescopic boom and an **8 meter** long extension arm that can be tilted at **30 degrees** will allow you to lift loads up to **42 meters**! The **Zoomlion QY30V** crane offers versatility and top performance with an optional lightweight winch that lifts loads up to **3 tons** at high speed!
